

Manufacturer's guaranty	Complete 2 years coverage offered by ECO-DETOX	Usually no guaranty or 1 year guaranty offered by an independent reseller
User's manual	Comprehensive informative booklet with technical instructions (English and French)	Booklet generally only in English and does not cover everything
Control interface	Big 5" X 8" touch screen	Push buttons, no interface and, sometimes, a small or medium size screen
Commands	In English and French on the control screen	In English only
Exterior casing	Single moulding made of polycarbonate, which is light, hygienic and shatter-proof	Many pieces made of conventional PVC or environmentally damaging heavy metals
Internal processor	Professional master program, flexible and rigorous concerning many control parameters	Master program usually Chinese and limited as to its capacities to run the session
Power supply	Powerful external power supply (24 volts converter) that is safe and conforms to FCC, ULC and CE standards	In the casing (less safe) and usually does not conform to electrical construction standards
Program	Flexible with three variables and has safe, auto-adjusted and intelligent operational limits	Usually, the program does not adjust to the acidity level of the user or the voltage does not adjust automatically
Flexibility	Device with two identical sides that can be activated simultaneously or not	Simple or double device
Design	Superior quality electronic pieces and state of the art manufacturing	Pieces of uncertain quality (cheap) and mechanical technology (old)
Assembling	Executed by a knowledgeable and competent specialist in electronics	Executed by inexperienced employees (frequent mistakes)
Ventilation	No fan since the internal electronic pieces produce very few to no heat	Usually comes with a noisy fan in order to avoid a overheating of the power transistor or the internal power regulator
Safety	Power hit fuse (on each side)	Power hit fuse
Heating belt	Included	Some devices are equipped with it, others are not
